1. Welcome Addresses

Welcome Address by the Dean of Faculty of Sciences Ben M'Sick at Hassan II University of Casablanca

Pr. Abdeslam EL BOUARI

It is with great pride that the Faculty of Sciences Ben M'Sick at Hassan II University of Casablanca hosts the China International College Students' Innovation Competition (2026) Moroccan Regional Competition, one of the world leading international competitions dedicated to innovation and student entrepreneurship.

Through this event, our Faculty reaffirms its commitment to academic excellence, innovation, and the development of entrepreneurial skills among Moroccan youth. This competition provides a unique platform for students to transform their ideas into concrete projects, address the challenges of our time, and contribute to economic and social development.

The organization of this edition is fully aligned with Hassan II University of Casablanca's internationalization strategy and its commitment to strengthening academic, scientific, and technological cooperation with leading partners around the world. It also reflects the strength and the quality of the cooperative relationship between the Kingdom of Morocco and the People's Republic of China in the fields of higher education, scientific research, and innovation.

We hope that this initiative will bring together universities,higher education institutions, research centers, businesses, and institutional partners around a shared ambition: to unlock the potential of our youth, promote initiative, and showcase Moroccan innovation on the international stage.

I wish all participants an enriching experience, fruitful exchanges and every success in this inspiring competition.

2. About the Competition

2.1 Overview

The China International College Students' Innovation Competition is an international innovation and entrepreneurship contest organized under the guidance of Ministry of Education of the People's Republic of China. It is open to university students and young scholars worldwide, and aims to provide a cross-cultural and cross-disciplinary platform for youth innovation, accelerate the transformation of research outcomes into practical applications and cultivate the next generation of global talent in support of building a community with a shared future for humanity.

2.2 Background

Originating from university innovation and entrepreneurship competitions in China, the Competition has been held annually since its inaugural edition in 2015. To date, it has attracted nearly one million participants from more than 4,000 universities across over 100 countries and regions. Participating project span a wide range of fields, including next-generation information technology, intelligent manufacturing, new energy, advanced materials, biomedical and pharmaceutical innovation, modern agriculture, cultural creative industries, and social services. Today, the Competition has become one of the world's largest and most influential innovation and entrepreneurship competition for college students.

2.3 Competition Categories

This edition channels the creative energy and entrepreneurial potential of youth through two competition categories — Creative and Entrepreneurship — aiming to spark innovative thinking, bridge the gap between ideas and real-world impact, and connect the next generation of talent with global industry and social development.

- **Creative Category:** It focuses on original thinking and innovative design, encouraging participants to put forward distinctive ideas and feasible practical solutions, mainly focusing on idea innovation, functional design and scene application.
- **Entrepreneurship Category:** It centers on practical operation and industrial landing, attaches importance to the market practicability and development prospect of projects, and guides teams to combine professional knowledge with real social and market demands.

2.4 Project Value

- **Global Showcase:** Showcase student innovation and entrepreneurial achievements on an international stage, bringing outstanding projects to a global audience.

- **Global Network:** Connect with a global network of young innovators and institutions, fostering cross-border collaboration and an open innovation ecosystem.
- **Advancement & Cooperation:** Outstanding projects may advance to the Global Finals and participate in China-Africa innovation and entrepreneurship cooperation programs, unlocking greater opportunities for impact and partnership.

2.5 International Cooperation

The Morocco Regional Competition 2026 is jointly organized by Beijing Institute of Technology, Hassan II University of Casablanca, the Faculty of Sciences Ben M'Sick and the Sino-North Africa Education Innovation Association (SNAEIA). The competition serves as a platform for strengthening long-term cooperation between Chinese and African higher-education institutions in innovation education, young-scholar exchange, joint incubation, and translation of research outcomes.

Through the Competition platform, participating stakeholders engage in cooperation in technical standards, talent development, resource sharing, and joint education programs, supporting the internationalization of vocational education and workforce development for global industries.

2.6 Future Outlook

Looking ahead, the Competition will continue to expand its international network, foster regular innovation-cooperation mechanisms among universities worldwide, and build a community of youth innovation to deliver youth-led solutions for global sustainable development.
